LEAN ENGINEERING FOR LEAN CONSTRUCTION.

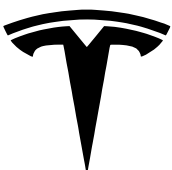

COMPANY OVERVIEW

Founded in 2009, Pragmatic Professional Engineers specializes in the design and specification of building systems. We offer practical innovative solutions for a variety of industries.

We identify exactly what is required and appropriate for each project. With a variety of service offerings, every part of system is specifically engineered to assure the needs and budget the client will be met - including first and long term costs - while maintaining robust performance.

In rapidly changing times, our firm is committed to staying on top of manufacturing improvements, industry approaches, and code changes. We take pride in using leading edge technology and information to cut through old means and methods, giving our clients the most advanced, cost-effective, and energy efficient systems possible.

PAST PERFORMANCE

LICENSES AND CERTIFICATIONS

- 10 Licensed Professional Engineers
- 3 LEED Accredited Professionals
- 1 Project Management Professional
- NEBB Certified for Test & Balance
- NEBB Certified for Commissioning

CORE COMPETENCIES

- Mechanical Engineering
- Plumbing Engineering
- Electrical Engineering
- Process Piping Engineering
- Fire Protection Engineering
- Life Cycle Cost Analysis
- Lighting Design
- Energy Modeling
- Computational Fluid Dynamic Modeling
- Carbon Monoxide Mass Transfer Modeling
